

# Cantara Administration Console Technical Requirements

The minimum software and hardware requirements for a basic Cantara installation with minimal user load are listed in the following tables. You should determine the appropriate Java configuration and hardware for your environment and intended load. Also, refer to the minimum technical requirements for your chosen application server.

On This Page

## Software Requirements

Product	Minimum Versions
Java	1.8.0_11 or greater
Java configuration	Maximum heap size of at least 512 MB
Application server	Apache Tomcat 8.0.9+ JBoss EAP 7.0+ Oracle WebLogic 12.1.1+ Wildfly 10.0+

## Hardware Requirements

Component	Minimum Version
CPU	Dual Core 1.5 GHz or greater
Available memory	2 GB RAM
Hard disk	50 MB plus log space
