

Cantara Development Guide

Cantara offers wrappers to interact with its web services; each one tailored to a specific technology. If a solution does not exist for your chosen technology or you want to build your own wrapper, this guide will help you.

Before building your own wrapper, we recommend you review the following topic to gain an understanding of the web services and extensions offered by Cantara:

- [Cantara Client Development](#)
- [Developing Cantara Extensions](#)
- [Cantara JD Edwards Components](#)
